## **Leading Midstream Executive Offers Insight on Two Stages During Hart Energy's Upcoming Conference Combo**

Houston (August 3, 2016) – **Jim Teague**, CEO of Enterprise Products Partners L.P., one of the largest publicly traded energy partnerships and a leading North American provider of midstream services, will follow his September 13 keynote address to Hart Energy's **MIDSTREAM Texas** conference with a special "fireside chat" in front of an upstream audience at the 2016 **DUG Eagle Ford** conference and exhibition. Both industry events will be co-located at the Henry B. Gonzalez Convention Center in San Antonio, which has hosted Hart Energy's **DUG Eagle Ford** conference annually since 2010.

Teague was promoted to chief executive at Enterprise Products Partners in January this year. In his keynote to the **MIDSTREAM Texas** audience, he will review the state's critical midstream infrastructure, including significant project forecasts. In a more relaxed setting at **DUG Eagle Ford**, Teague and Leslie Haines, Hart Energy's executive editor-at-large, will discuss today's oil and gas dynamics, including his thoughts on the rapidly developing market for ethane exports.

In 2015, Enterprise extended its integration into the NGL- and condensate-rich areas of the Eagle Ford by purchasing EFS Midstream LLC from affiliates of Pioneer Natural Resources and Reliance Industries for \$2.15 billion. Those assets included ~460 miles of gas pipelines, 10 gathering plants, 780 MMCF/D of treating capacity and 119,000 BPD of condensate stabilization capacity. Late last year, Enterprise completed an expansion of its LPG export terminal on the Houston Ship Channel, raising its capability to load low-ethane propane to 16 million barrels per month.

Teague joins slates of speakers that include executives from Shell Pipeline, Marathon Oil, EnLink Midstream, Noble Energy, EnCap Flatrock Midstream, and Pioneer Natural Resources. Online registration with early bird discount expires Friday, August 19. To view agendas or register, visit [DUGeagleFord.com](#) or [MidstreamTexas.com](#).
