

SIGNAL PEAK SILICA, LLC

4605 Post Oak Place Drive | Suite 100 | Houston, TX 77027

About Us

Signal Peak Silica, LLC (“SPS”), formerly Preferred Sands, is headquartered in Houston, TX, and is a leading in-basin supplier in the frac and energy marketplace with a 9mmpta nameplate capacity. SPS boasts a large customer portfolio for its proppant services due to its mine locations and ability to meet market needs. At its core, SPS is devoted to bringing customers value through safe and environmentally responsible sand production, reliable and consistent supply, excellent customer service and low landed cost delivered to well. The company is also focused on building partnerships to further its growing demand and has developed an extensive vendor network of sand and logistics providers to offer a full-service distribution model for its customers.

Mid-Con Operation

Located in the heart of the STACK, SPS services this region from its Oakwood plant—the largest mine in the Mid-Con basin. With access to four transload facilities nearby, SPS Oakwood has expanded its storage network with these third-party operations to provide multi-origin logistical cost advantages for its dedicated customer base. SPS produces both 40/70 and 100 mesh grade products with state-of-the-art silo loadout and kiosk entry system. The company strives to exceed industry API spec standards through advanced cleaning and screening systems within its wash and dry plants and offers a competitive edge when it comes to both quality and consistency.

Looking for service that is unmatched in the STACK/SCOOP? Contact Joe Prince (Sr. Sales Manager) at JPrince@spsilica.com or call (610)-731-6330.

Why is SPS a trusted name in the industry?

- **First mover**—First operational in-basin for the Permian, Eagle Ford and Mid-Con.
- **Financial stability**—SPS is the only in-basin sand company to have successfully undergone organizational restructuring.
- **In-Basin Only Locations**—SPS is the only supplier with in-basin only plants, located within 100 miles of 80% of the Permian, Eagle Ford and SCOOP/STACK proppant demand.
- **Surety of Supply**—SPS has a large vendor network of sand and logistics providers to offer a full-service distribution model for our customers.
- **Operational Efficiency**—SPS’s extensive investment in equipment and people allows us to be a leader in safety, quality and safe production.
